This is a communication from the examiner in charge of your application.  
COMMISSIONER OF PATENTS AND TRADEMARKS

☒ This application has been examined ☐ Responsive to communication filed on \_\_\_\_\_ ☒ This action is made final.

A shortened statutory period for response to this action is set to expire three month(s), \_\_\_\_\_ days from the date of this letter.  
Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133

Part I THE FOLLOWING ATTACHMENT(S) ARE PART OF THIS ACTION:

- |   |  |
|---|--|
| 1. <input checked="" type="checkbox"/> Notice of References Cited by Examiner, PTO-892. | 2. <input type="checkbox"/> Notice re Patent Drawing, PTO-948.                   |
| 3. <input type="checkbox"/> Notice of Art Cited by Applicant, PTO-1449.                 | 4. <input type="checkbox"/> Notice of Informal Patent Application, Form PTO-152. |
| 5. <input type="checkbox"/> Information on How to Effect Drawing Changes, PTO-1474.     | 6. <input type="checkbox"/> _____  |

Part II SUMMARY OF ACTION

1. ☒ Claims 1-4, 6-11, and 13 are pending in the application.

Of the above, claims \_\_\_\_\_ are withdrawn from consideration.

2. ☐ Claims \_\_\_\_\_ have been cancelled.

3. ☐ Claims \_\_\_\_\_ are allowed.

4. ☒ Claims 1-4, 6-11, and 13 are rejected.

5. ☐ Claims \_\_\_\_\_ are objected to.

6. ☐ Claims \_\_\_\_\_ are subject to restriction or election requirement.

7. ☐ This application has been filed with informal drawings under 37 C.F.R. 1.85 which are acceptable for examination purposes.

8. ☐ Formal drawings are required in response to this Office action.

9. ☐ The corrected or substitute drawings have been received on \_\_\_\_\_. Under 37 C.F.R. 1.84 these drawings are ☐ acceptable. ☐ not acceptable (see explanation or Notice re Patent Drawing, PTO-948).

10. ☐ The proposed additional or substitute sheet(s) of drawings, filed on \_\_\_\_\_ has (have) been ☐ approved by the examiner. ☐ disapproved by the examiner (see explanation).

11. ☐ The proposed drawing correction, filed on \_\_\_\_\_, has been ☐ approved. ☐ disapproved (see explanation).

12. ☐ Acknowledgment is made of the claim for priority under U.S.C. 119. The certified copy has ☐ been received ☐ not been received  
☐ been filed in parent application, serial no. \_\_\_\_\_; filed on \_\_\_\_\_

13. ☐ Since this application appears to be in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11; 453 O.G. 213.

14. ☐ Other

EXAMINER'S ACTION

Art Unit 2609

1. This application has been examined.
2. The amendment filed January 06, 1993 is objected to under 35 U.S.C. § 132 because it introduces new matter into the specification. 35 U.S.C. § 132 states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: Page 1, line 9 to page 3, line 7, "the first step...processing step" and page 3, line 15 to page 4, line 2, "In table IV...in column 1".

Applicant is required to cancel the new matter in the response to this Office action.

3. The drawings are objected to under 37 C.F.R. § 1.83(a). the drawings must show every feature of the invention specified in the claims. Therefore, the associating tags means as recited in claims 1 and 7. The processing means as recited in claims 1 and 7. The means for accessing the frames of video data as recited in claims 2, 6, and 8 must be shown or the feature cancelled from the claim. No new matter should be entered.

4. The drawings must show how "the storage means coupled to the associating tags means, the associating tags means coupled to the processing means, the processing means coupled to the associating positions means, and the accessing the frames of video data means coupled with the position selecting means and associating positions means as recited in claims 1, 2, 6, and 7.

Art Unit 2609

5. The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The specification is objected to under 35 U.S.C. § 112, first paragraph, as failing to provide an adequate written description of the invention. The applicant has failed to disclose the exact "means for associating tags with frames of video data..." as recited in claims 1 and 7. How is the "associating means" coupled to the storage means since the drawings do not show the "associating tags means" as specified in the claims. What exactly is the "associating positions mens", and how is this "associating positions means" coupled to the "processing means" since the drawings do not show the "associating positions means" as specified in the claims. What exactly is the "means for accessing the frames of video data", and how is this "means for accessing the frames of video data" coupled with the "position selecting means" and "means for associating positions" since the drawings do not show the "means for accessing the frames of video data". Claims 1, 2, 6, 7, and 8 are vague, indefinite, and confusing since the drawings do not show the claimed feature in which applicant regards as the

Art Unit 2609

invention.

6. Claims 1-4, 6-11, and 13 are rejected under 35 U.S.C. § 112, first paragraph, for the reasons set forth in the objection to the specification.

Dependent claims are rejected for incorporating the defects from their respective parent claims by dependency.

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --  
(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1, 2, 7, 8, and 9 are rejected under 35 U.S.C. § 102(b) as being anticipated by Naimark et al (4,857,902).

As per claims 1 and 7, as best understood, Naimark discloses (FIGS. 1, 2 and 5) an apparatus for assembling content addressable video which comprises a storage means (51) (frame buffer), an associating tags means (FIG. 1) (the data space), a processing means (50) (computer), and means for associating positions (the data space table) (col. 8, lines 44-63).

As per claims 2 and 8, Naimark discloses (fig. 5) means for selecting a position (53) (trackball), and means (50) (computer) for accessing the frames of video data in the storage means (51) (frame buffer).

As per claim 9, Naimark further discloses (FIGS. 1-2) the

Art Unit 2609

subset of the plurality of frames (N14, N15, N8, N9) is the subset of frame (N4).

9. Claims 3, 6, 10, and 13 are rejected under 35 U.S.C. § 102(e) as being anticipated by Morgan (4,992,866).

As per claims 3 and 10, Morgan (FIGS. 1 and 2) means (30) (touch screen) for generating a content video image representative, an organization of content addressable video, control means (20) (32) (processor) (video switcher) for generating control signals (col. 3, lines 49-58), controllable means (80) (34) (remote cameras and controllers) for generating frames of video data (col. 3, lines 34-58), and the processor means (20) for associating frames of video data generated by the controllable means.

Morgan further discloses (FIG. 2) a storage means (processor), coupled to the controllable means (80) (34), for storing frames of video data generated by controllable means (col. 3, lines 42-48), and means (20) (processor) coupled to the controllable means (80) (34) and control means (32) (20), for associating the address of each frame of video data with a position in the content video image (col. 3, lines 34-58).

As per claims 6 and 13, Morgan discloses (Figs. 1 and 2) means for selecting a position in the content video image (20) (44), and means (20) (processor) for accessing the frames of video data in the storage means in response to selected positions

Art Unit 2609

(col. 2, line 63 to col. 3, line 19).

10. The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

11. Claims 4 and 11 are rejected under 35 U.S.C. § 103 as being unpatentable over Morgan in view of International Conference on Advanced Robotics (85 ICAR) Toshiba Corporation (Sept. 13, 1985).

Claim 4 and 11 are considered rejected as set forth above, regarding to claims 3 and 10, with the exception of robot mounted video camera.

However, Toshiba Corporation discloses (FIG. 4) a robot mounted video camera which is controlled by the computer input device (tablet). It would have been obvious to incorporate the robot mounted video camera of Toshiba Corporation into the camera selection and positioning system of Morgan since this is well-known in the art.

Art Unit 2609

12. Applicant's arguments filed January 26, 1993 have been fully considered but they are not deemed to be persuasive.

Objection to the Drawings and Specification and the 35 U.S.C. § 112, first paragraph rejection.

Applicant argues at page 5, line 11 to page 6, line 5, with regard to the objection to the drawings and specification by asserting that the amended specification, filed January 06, 1993, will more clearly specify how the modules, which are claimed in the present invention, are interconnected. However, after carefully review the amended specification, Examiner still find the amended specification failing to provide an adequate written description of the claimed invention. The amended specification fails to teach how the "associating tags means", the "processing means", the "associating positions means", and the "accessing video frames means" are connected and interacted with each other as specified in the claims. Furthermore, the amended specification clearly introduces new matter into the disclosure of the invention since it not supported by the original disclosure (see, letter paragraph 2 as set forth above).

As to the Objection to the Drawings, rule 37 CFR 1.83(a) states that "the drawings must show every feature of the invention specified in the claims". Applicant should note that rule 37 CFR 1.83(a) is only complied when the drawings match with the claims, but not the specification. Therefore, the amended

Art Unit 2609

specification does not overcome the Objection to the Drawings under rule 37 CFR 1.83(a) as stated above in letter paragraph 3.

Rejection of claims 1, 2, 7, 8 and 9 Under 35 U.S.C. § 102(b)

Applicant argues at page 6, lines 6-14, with regard to the Naimark reference by asserting that "Naimark et al does not provide means for automatically assembling the database for the content image. Rather, in that system the content image was assembled manually and the frames associated with that content image by manual tabulation. This limitation is not found in the claims. Claimed subject matter, not the specification, is the measure of invention. Limitations in the specification cannot be read into the claims for the purpose of avoiding the prior art. In re Self, 213 USPQ 1,5 (CCPA 1982); In re Priest, 199 USPQ 11,15 (CCPA 1978).

Rejection of claims 3, 6, 10 and 13 Under 35 U.S.C. § 102(b)

Applicant argues that "the Morgan reference is concerned with controlling surveillance cameras and not generating a data base of addressable stored video images as claimed in the present application". However, the Morgan's controlling surveillance cameras may work differently to the applicant's device, but is broadly reads on the claims.

As per claims 4 and 11, see the rebuttal to the applicant's arguments with regards to the Morgan reference as set forth

Art Unit 2609

above.

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Stern (4,600,919) discloses an improved method and apparatus for generating a sequence of video frames representative of three-dimensional animation.

14. This is a continuation of applicant's earlier application S.N. 07/640,489. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds or art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See M.P.E.P. § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS FINAL ACTION IS SET TO EXPIRE THREE MONTHS FROM THE DATE OF THIS ACTION. IN THE EVENT A FIRST RESPONSE IS FILED WITHIN TWO MONTHS OF THE MAILING DATE OF THIS FINAL ACTION AND THE ADVISORY ACTION IS NOT MAILED UNTIL AFTER THE END OF THE THREE-MONTH SHORTENED STATUTORY PERIOD, THEN THE SHORTENED STATUTORY PERIOD WILL EXPIRE ON THE DATE THE ADVISORY ACTION IS MAILED, AND ANY EXTENSION FEE PURSUANT TO 37 C.F.R. § 1.136(a) WILL BE CALCULATED FROM THE MAILING DATE OF THE ADVISORY ACTION. IN NO EVENT WILL THE STATUTORY PERIOD FOR RESPONSE EXPIRE LATER THAN SIX MONTHS FROM THE DATE OF THIS FINAL ACTION.
